PROFESSIONAL SUMMARY

Backend Engineer with 4.5+ years of experience building scalable SaaS platforms, Node.js microservices and distributed systems serving 150K+ users. Expert in performance optimization using Redis caching, PostgreSQL/MongoDB indexing & query optimization, AWS infrastructure, and event-driven architectures fixing production incident triage, root-cause analysis. Proven track record in Fintech and high-volume payment processing systems handling (**2M+ transactions monthly**)

WORK EXPERIENCE

EWNS Web Services Pvt Ltd

Hyderabad, India

Senior Software Engineer (SSE)

Jan 2026 - Present

- Led the architecture and end-to-end delivery of business-critical backend services, driving scalability, reliability, and maintainability across multiple financial microservices.
- Mentored engineers through design discussions, code reviews, debugging sessions, and engineering best practices while improving development velocity and code quality.
- Owned production systems by leading incident response, root-cause analysis, observability improvements & performance optimization, significantly improving service reliability & reducing MTTR.

Software Development Engineer II (SDE 2)

Jan 2024 - Jan 2026

- Led architecture decisions for **12+ microservices** implemented fault-tolerant circuit breakers, retries and async event processing improving system reliability for high-traffic financial operations.
- Reduced API latency by **40%** for **150K+ daily active users** through Redis caching, PostgreSQL indexing & query optimization (1s to 200ms), MongoDB compound indexes & aggregation pipelines and blue-green deployments on AWS ECS.
- Built CRON statement generation system processing **150K+ financial documents monthly** using Goroutines & channels NodeJs workers, BullMQ job queues, Redis, & AWS S3 & SES. Also used OWS & OEDQ for anti-money laundering(AML), data profiling, cleansing and de-duplication.
- Production incident triage, root-cause analysis, operational support. OpenTelemetry-based distributed tracing and CloudWatch monitoring, **AI assisted development & code review** reducing MTTR by **60%** in production services.

Software Development Engineer I (SDE 1)

Jan 2023 - Jan 2024

- Built KYC/AML verification pipeline for **150K+ users** integrating Plaid IDV, Atelio-Bond, and Persona APIs with **98% accuracy** for biometric liveness detection and watchlist screening (OWS).
- Developed Plaid/Bond integration fetching **3-6 months transactional banking data** calculating Cashflow Scores for instant advance eligibility (reduced approval time from 48 hrs to **30 mins**).
- Designed background workers handling **2M+ monthly transactions** including loan disbursements, repayments and card authorizations with double-entry ledger system.
- Implemented JWT-based authentication and RBAC across **custom user roles**, wrote comprehensive unit/integration tests using Jest achieving **85% code coverage**.

Software Developer

Sutara IT Solutions, Kolkata

Apr 2022 - Jan 2023

- Developed & optimized webapp performance using lazy loading, image compression, and caching strategies, reducing page load time from 4.2s to **1s** (57% improvement).
- Worked and learn Golang, Gin, net-http, Go-routines & channels, Nodejs, Redis, PostgreSQL, AWS S3, EC2, Cloudwatdch, Docker .

TECHNICAL SKILLS

Languages: Golang, TypeScript, JavaScript, Java

Backend: **Gin, Net-http, Goroutines, Channels, Node.js, NestJS, Express.js**, Bun.js, REST APIs, Microservices, Distributed Systems, Event-Driven Architecture, Design Principles & Patterns, Performance Optimization

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

DB & Caching: PostgreSQL, MySQL, Redis, MongoDB, TypeORM, Prisma, Mongoose

Testing: Jest, Supertest, Unit Testing, Integration Testing and e2e Testing using Playwright

Cloud & DevOps: AWS EC2 Lambda ECS S3 SQS SES CloudWatch IAM GitHub Actions CI/CD

Tools: Docker, Kubernetes, Postman, Kafka, BullMQ, OpenTelemetry, Git, Jira, REST-Swagger/OpenAPI, Oracle Watchlist Screening (OWS), Oracle Enterprise Data Quality (OEDQ)

EDUCATION

LNCT Bhopal

B.Tech in Civil Engineering

CGPA: 7.88/10

Bhopal, India

July 2017 - June 2021

CPP Hisar

Intermediate (12th) - State Board BSEB

Madhubani, India

2014 - 2016

High School Uttra

Matriculation (10th) - State Board BSEB

Madhubani, India

2012 - 2014

PROJECTS

Library Management System

LNCT Bhopal

- Developed full-stack application managing **1000+ books**, **500+ students**, and **50+ staff** with role-based access control (Admin, Librarian, Student).
- Designed **12+ relational database tables** with optimized queries reducing search time from 3s to **200ms**. Built RESTful APIs for inventory, borrowing, and fine calculation.
- **Tech Stack:** MERN stack, PostgreSQL, Schema Validation, Tailwind CSS, JWT & OAuth

Personal Portfolio & Blog

Personal Project

- Built modern portfolio with blog functionality using Next.js, Tailwind CSS, and MDX for technical writing using Next.js, React.js, TypeScript, Tailwind CSS, MDX, Vercel
- Implemented SSR and SSG for optimal performance and SEO. Deployed on Vercel with CI/CD.

ACHIEVEMENTS

- **GATE 2022:** All India Rank (AIR) 1800 among in Computer Science Engineering
- **Hackathon:** Won **1st Prize** at LNCT TechFest for Library Management System solution
- **LeetCode:** Solved **100+** Data Structures & Algorithms problems
