Jobs of interest

I'm interested in Mid to Senior developer jobs, where I work with my main technologies.

Experience

Senior Software Engineer (SSE)	09/2026 - 09/2026
EWNS (Hyderabad India)	Less than a month
Led the architecture and end-to-end delivery of business-critical backend services, driving scalability, reliability, and maintainability across multiple financial Microservices.	
• Mentored engineers through design discussions, code reviews, debugging sessions, and engineering best practices while improving development velocity and code quality. • Owned production systems by leading incident response, root-cause analysis, observability improvements and performance optimisation, significantly improving service reliability& reducing MTTR.	
GolangNodeJSNestJsExpress.jsPostgreSQLAWS CI/CDGithub Actions	
SDE 2	01/2024 - 01/2026
EWNS (Hyderabad India)	2y
Led event-driven microservices with AWS SQS & BullMQ, processing 2M+ monthly transactions with 99.99% success rate	
• Optimized high-traffic systems for 150K+ users, reducing API latency by 40% via Redis caching & PostgreSQL master-slave replication • Implemented blue-green deployments achieving zero-downtime for critical payment systems • Built automated reconciliation and statement generation systems using Node.js workers, reducing manual effort by 90%	
Golang, Node.js, Goroutines, Channels, Net/http, Mux, NestJS, JavaScript, TypeScript, PostgreSQL, Redis, AWS (SQS, S3, SES, EC2, ECS, Lambda mand many others), BullMQ, Docker, Swagger, REST APIs	
SDE1	01/2023 - 01/2024
EWNS (India/Hyderabad)	1y
Built & enhanced e2e user onboarding and KYC/AML verification pipeline integrating Plaid IDV, Atelio-Bond and Persona APIs for biometric liveness detection and watchlist screening reducing manual verification from 3 days to 15 minutes.	
• Designed double-entry ledger system processing 2M+ monthly transactions incl. loan disbursements & repayments • Built Plaid/Bond integration services to fetch 3-6 months of transactional banking data for 150K+ users, calculating Cashflow Scores for instant advance eligibility without hard credit pulls. • Built REST APIs and background workers handling 2M+ monthly transactions including loan disbursements, repayments, and card authorizations with double-entry(ledger system) accounting. • Implemented idempotency ensuring 100% accuracy in financial transactions and used CQRS Pattern.	

SDE

04/2022 - 01/2023

Sutara IT Solution (Kolkata India)

9m

Optimized WordPress site performance - 45% faster loading through code minification & CDN

- Implemented 50+ custom forms with validation, reducing user drop-off by 30%
- Executed SEO strategy increasing organic traffic by 60% in 6 months
